RE: Additional Meeting and Tour Request for the Public Utilities, Energy, and Technology Interim Committee

Dear President Adams and Speaker Wilson:

We would like to request an additional meeting for the Public Utilities, Energy, and Technology Interim Committee for July 31, 2019, and further request per diem for all committee members in attendance. The meeting will be followed by a tour of the Utah Associated Municipal Power Systems (UAMPS) Nebo Power Plant facility in Payson, Utah.

This meeting and tour would offer valuable insight and experience into key planning and development issues often raised before the committee. Mike Squires, Government Affairs Director of UAMPS, has offered to arrange the tour and provide an exclusive opportunity for questions and further study.

Respectfully,

Senator Ronald Winterton, Chair
Public Utilities, Energy, and Technology
Interim Committee

Representative Carl R. Albrecht, Chair
Public Utilities, Energy, and Technology
Interim Committee
